## **PRESS RELEASE**

### **Osmose Utilities Services Celebrates 80 Years**

TYRONE, Ga. – Osmose Utilities Services, Inc. today commemorates the 80<sup>th</sup> anniversary of its founding in 1934. From a single wood preservative patent and a handful of employees in Buffalo, New York, Osmose has grown into a nationwide service provider with thousands of employees accessing, restoring, and maintaining utility infrastructure across North America.

“While much of the credit for our growth and success is a result of the outstanding effort and character of our employees, much of the credit also belongs to our customers; they’ve come to trust Osmose with their business and we are truly grateful for their continued loyalty. The utility industry will continue to evolve and new challenges will present themselves, but we feel well-positioned to provide our customers with relevant and effective solutions to meet those challenges. As we enter our ninth decade, we do so with great excitement for the opportunities that lie ahead” said Larry Larson, President & CEO.

#### **About Osmose Utilities Services, Inc.**

Osmose provides professional grade inspection, maintenance, life extension, and rehabilitation services designed to help build resiliency into T&D infrastructure. Osmose also provides corrosion mitigation and engineered repairs for steel structures, structural load analysis, and a variety of turnkey infrastructure enhancement and upgrade solutions. With 80 years of diverse experience as a foundation, Osmose proudly serves America’s utilities as they manage aging infrastructure and build tomorrow’s intelligent utility.
