

Underground Vault Assessment

Accelerate and enhance the safety of electric utility and telecommunication vault assessments.

Scalable, Certified Workforce

Technically trained, certified, and experienced Osmose technicians conduct a thorough assessment of the vault's condition, complete an internal equipment inventory, and report critical findings to help system owner's proactively mitigate risk.

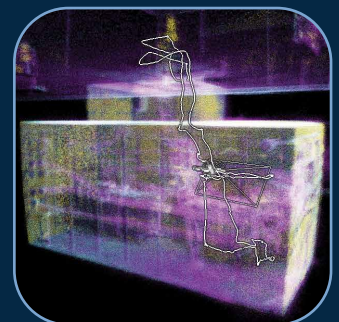

Safer, Faster, More Efficient

Osmose combines an accredited workforce with cutting-edge with Uncrewed Aerial System technology keep personnel at a safe distance outside of hazardous or condemned vaults. We leverage the Elios 3-compatible Flyability software to generate same-day reporting of special points of interest for rapid decision-making.

Accelerated Mobilization & Delivery

From safety alignment to crew configurations, traffic control, permitting, and reporting requirements, Osmose manages end-to-end vault assessment logistics to ensure assessment readiness, seamless mobilization, and timely post-assessment deliverables.
