Leveraging 90 Years of Structural Expertise to  
Educate the Next Generation of Utility Personnel

# OSMOSE UNIVERSITY TEXAS

Join fellow utility asset management and engineering professionals for our Osmose University seminar hosted in Texas. Industry subject matter experts will provide two days of instruction on wood, joint use, and underground best practices.

**October 27 - 29, 2025 | Austin, TX**

## Wood & Joint Use Topics

- Pole Strength and Loading Basics
- Wood Pole Standards
- Wood Pole Inspection Approaches (methods and technologies)
- Remedial Preservative Treatments and Environmental Considerations
- Inspection Technologies and Devices
- Restoration, Resiliency, and System Hardening
- Optimizing Application Management
- Fiber and Wireless Make-Ready Design Considerations
- Establish an Accurate Attachment Baseline to Support Billing, Permitting, and Future Audits
- Understanding and Implementing Pole Loading Analysis to Manage Risk
- Technologies, Visualization, and Process Improvements to Support Increases in Permitting Activity

## Underground Topics

- Basics of Underground Cable
- Cable Assessment and Life Extension
- Vault Assessment and Life Extension
- Padmount Transformers - Assessment and Life Extension
- Contact Voltage Assessment

## Complimentary for Osmose customers

Includes:

- Instruction time eligible for PDH credit
- Welcome dinner reception
- Meals and breaks during seminar

## Who Should Attend?

- Asset and Risk Managers
- Utility T&D Engineers
- Program Managers
- Operations Supervisors
- Joint Use Managers Engineering

**LIMITED SPACE AVAILABLE**

Register online at [osmose.com/osmose-university-texas](https://osmose.com/osmose-university-texas)

Attendance is limited to asset owners with a focus on first-time attendees.
