

TOUGH TRUSS® CORE

RESTORE & EXTEND WOOD POLE LIFE
5X FASTER & 5X MORE COST-EFFICIENT.

The Osmose Tough Truss® Core is a steel truss restoration system that rapidly and affordably prevents groundline failure of weakened poles, ensuring safety, service reliability, and resiliency for 40+ years.

Faster

- Installs faster than pole replacement
- No permitting, facility relocation, or third-party attachment moves required
- Accelerates reconductoring efforts and joint-use attachment plans

Cost-Effective

- Eliminates pole replacement materials, equipment, and disposal costs
- No outages, additional labor, traffic control required
- 100% capitalized expenditure

Field-Proven

- Patented design, manufactured in-house
- Protected from supply chain volatility
- Proven through continuous testing and field validation
