

TOUGH TRUSS® UPGRADE

BOOST WOOD POLE CAPACITY
BY 1, 2, OR 3 CLASSES.

The Osmose Tough Truss® Upgrade is a steel truss capacity enhancement system for any length and class distribution pole. Rapidly and affordably ensure safety, service reliability, and resiliency for 40+ years.

Faster

- Installs faster than pole replacement
- No permitting, facility relocation, or third-party attachment moves required
- Accelerates reconductoring efforts and joint-use attachment plans

Cost-Effective

- Eliminates pole replacement materials, equipment, and disposal costs
- No outages, additional labor, traffic control required
- 100% capitalized expenditure

Field-Proven

- Designed and manufactured in-house
- Protected from supply chain volatility
- Proven through continuous testing and field validation
